Breathing Better NZ Limited

AIR PURIFIER

Operating Manual

BB855 Lounge Room Purifier

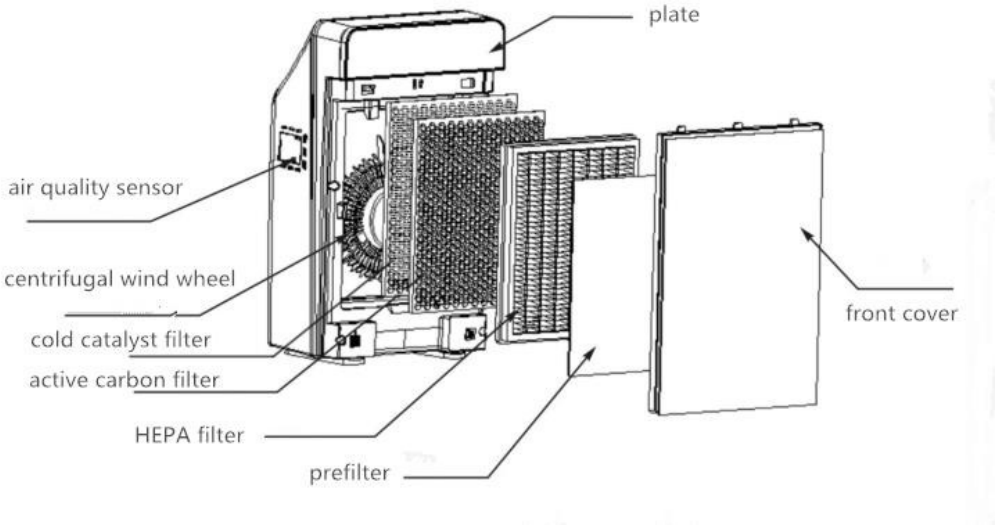

- Thank you for purchasing our product, please carefully read the operating manual before use
- If you have any questions, please contact us at info@breathingbetter.co.nz

BB855-2022/04

Assembly

1. Remove all packaging from the unit.
2. Place on a flat stable surface.
3. Place your fingers under the bottom of the front cover.
4. Pull the front cover out from the bottom to a 45-degree angle. It can be tight but does come out.
5. Lift the front cover up to remove it from the unit.
6. Remove all packaging from the filter
7. With the pull tabs towards the front, gently place the filter into the unit.
8. Apply gentle pressure to insert the filter into the unit.
9. Replace the front cover by inserting the top buckles into the holes at the top below the display panel.
10. Move the bottom of the front cover into the holes at the bottom of the unit.
11. Gently press the front cover into place. You will hear the front panel 'click' into position.
12. Place the unit where it has a minimum of 20 cm clear space around it.
13. Connect the supplied power cable to your power outlet.

Your Air Purifier

Turn on/off: Lightly touch 'On/Off' to start the purifier. Touch 'On/Off' again to turn the purifier off.

Air speed: Lightly touch the 'Speed' button to move between the 3 speed modes.

Sleep mode: suggested for use at night while sleeping. The backlight turns off and fan placed into low speed

Low mode: This is default speed setting for the unit, designed for normal everyday use.

Fast Mode: Use Fast Speed to purify when obvious air pollution or peculiar smells are in the room.

Timer: Lightly touch the 'Timer' button to turn on the auto-off function. Continue to lightly touch to scroll through the timer setting. Can be set for 1 to 8 hours and is displayed on the timer display.

Mode: Lightly touch the 'Mode button to turn on/off the UV Lamp which can sterilise the air passing through the unit. When on, the UV Lamp symbol is illuminated.

Lightly touch to turn on/off the Auto mode

Anion Mode: Anion mode can only be turned on/off only from the remote control

Automatic air quality detection

The unit is equipped with built-in highly sensitive 'peculiar smell' sensor that detects the air quality immediately after starting up.

When the air quality is good, the 'Good' indicator is illuminated.

The moderate indicator illuminates when the air quality if moderate

When the air quality is 'bad' the unit switches to 'fast mode' and locks the setting until the air quality returns to 'Good' or 'Moderate', when it unlocks from 'Fast mode'.

Remote Control: The unit comes with an Infra-red remote control that can be used up to 4-5 meters from the unit. Point the IR Remote at the receiving sensor on the unit, located on the right of the control panel

Filter Care and Replacement

Every 2-3 weeks remove the display panel and use a soft brush to gently brush the front of the filter to remove any larger particulates that have been captured.

Replacing Air Purifier Filter

The filter should be changed approximately every 6 months to maintain the effectiveness.

The display panel will indicate to you when the filter needs to be replaced.

Only use the filters supplied or provided by **Breathing Better NZ** in your Air Purifier.

Your Air Purifier Filters are: **BB855F Lounge Room Filter**

Order your replacement filters online at www.breathingbetter.co.nz or email us at info@breathingbetter.co.nz

Once you have replaced the filter with a new one, lightly touch and hold the 'Timer' button for 5 seconds to reset the warning

Cleaning your Air Purifier

- Turn off the unit and unplug the power cord.
- Clean the outside of the unit with a soft dry cloth.
- Use a soft brush to clean the air intake and outlet

Troubleshooting

Please check this table for before contacting us should your unit not be working as described.

Problem	Possible Cause	Try this...
The unit is not working	Power cord is not plugged in/there is no electricity	Plug in the power supply / check the power supply is working
	Unit is not turned on	Touch the 'On/Off' button
The purification effect is poor	Air inlet/outlet is blocked	Clean the filter using s a soft brush to remove particulates.
	Wrong installation of the filter direction	Reinstall the filter the correct way.
	The filter is too dirty	Replace the filter
Air volume is small	Filter may be dirty	Replace the filter
	Packaging not removed	Ensure all packaging is removed
Abnormal noise from unit	Ensure all packaging is removed and check for damage to the unit	
	Ensure the air inlet and outlet is not blocked by anything, and dean it if needed.	
	While the negative ion function is on, "fizz" sound is normal.	

If above corrective actions do not solve the problem, please contact Breathing Better NZ. For safety, please do not disassemble the unit and maintain by yourself to avoid damage.
