BPLSP-2022/04

Product Overview

On/Off button:

Lightly touch the On/Off button to turn the unit on. Lightly touch the on/off button again to turn the unit off.

Once on, the unit will start the fan at mid-speed, start the ionizer, and enter Bluetooth pairing mode. Using a Bluetooth enabled device to scan and pair with "GL-2109". Once paired you can play your music through the speaker.

Fan Speed button:

While in manual mode, lightly touch the Fan Speed button to select the fan speed. 3 Speeds: Low (dimmer blue indicator light); Medium (dim blue indicator light); High (bright blue indicator light)

Mode button:

Manual mode (blue indicator light); Sleep Mode (Indicator light goes off); Auto Mode (Green indicator light)

- **Manual Mode**: Fan speed can be adjusted, light colour changes uninterrupted.
- **Auto Mode**: under colour changing light condition, adjust to auto mode, the light turns to green. After warm up (about 2 ½ minutes) the light shows green/blue/red and the fan speed changes automatically based on TVOC air quality condition.

Air Quality	Light colour	Fan speed
Good	Green	Low
General	Blue	Med
Poor	Red	High

- **Sleep Mode**: Touch the mode button, blue indicator light dims and the blue mood light dims at the same time. Fan speed turns to low, all other lights turn off after 3 seconds. The unit is in sleep mode. Wake the unit by touching any button on the control panel, the unit goes back to original indication status but will re-enter sleep mode if no further command is given within 3 seconds.

Light Mode:

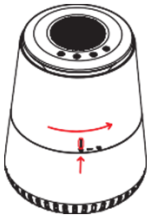

- Colour changing: Indicator button is blue
- Music light: Indicator light is purple. Light gets brighter when music gets louder and darker when music gets quieter.
- Night light: Indicator light is yellow

Bluetooth speaker

After turned on, the unit enters Bluetooth pairing mode automatically; once it is paired with a device they will connect again each time the Bluetooth function is enabled. You need to connect to Bluetooth each time the unit is powered off and on.

*Note: if the unit is already connected to a device the Bluetooth speaker is unable to pair/connect to another device without disconnecting the first device.

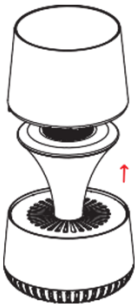

Cleaning LED Light Cover

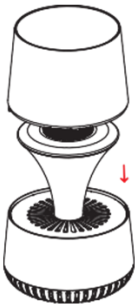

① To unlock the light cover, turn it counter clockwise until the "I" marking on the cover aligns with the "-" marking on the base.

② When the light cover is unlocked, lift it off the base.

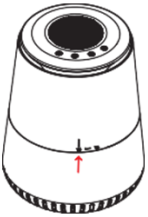

③ Lift the cover until it goes over control panel and completely remove it out for cleaning.

④ To reattach the light cover after cleaning, lay it down on to the lamp base.

⑤ Align the stud on the light cover with the recess on the lamp base,turn clockwise.

⑥ Both parts are locked when the marking "I" on the cover aligns with the marking "🔒" on the lamp base.

Unplug the unit before cleaning or changing filter

Cleaning frequency and method

Wipe the dusts and dirt with lightly moistened cotton swab stained with detergent or use water to clean once a month Re assemble the unit only after all parts are completely dry.

Filter Replacement

① 

Hold the handle part, turn the bottom cap counter-clockwise.

② 

When bottom cap reaches "open" marking, you may pull out.

③ 

Hold the ribbons on both sides of filter and then pull it.

④ 

Insert a new filter onto the recess.

⑤ 

Align clips of the bottom cap with the notches on the housing, press down .

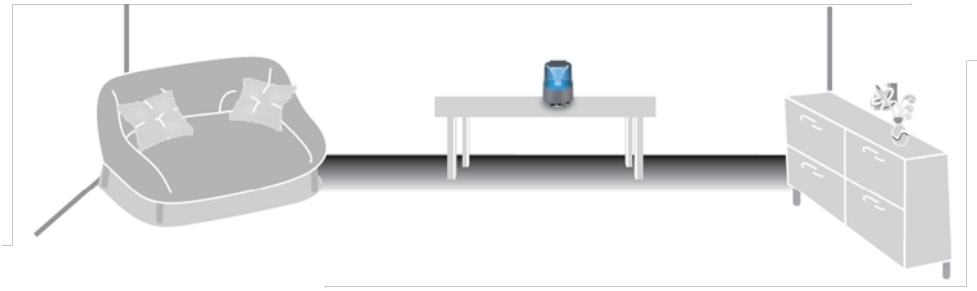

⑥ 

Turn bottom cap clockwise (towards the "close" marking) until you hear the click sound.

Only use the filters supplied or provided by **Breathing Better NZ** in your Air Purifier.

Your Air Purifier Filters are: **BPLSPF 3-in-1 Air Purifier Filter**

Order your replacement filters online at www.breathingbetter.co.nz or email us at info@breathingbetter.co.nz

If the unit stays at the same location for a long time.

The area (can be the wall or floor) around the unit will become a bit dirty. When cleaning the unit, it is recommended to move it away from its location or keep some distance from the wall.

If it is used to clean the airborne pollen and dust.

Pollen and dust usually fall on the ground, we recommend to place the unit on the ground.

If it is intended to enhance the air circulation in a room.

The air outlet must be kept away from furniture or wall by 0.3 M distance.

To avoid electromagnetic interference.

Keep 1.0 M distance away from TV, radio.

Do not share the power socket with TV and radio.

Troubleshooting

Please check this table for before contacting us should your unit not be working as described.

Problem	Possible Cause	Try this...
The unit is not working	Power cord is not plugged in/there is no electricity	Plug in the power supply / check the power supply is working
	Unit is not turned on	Touch the 'On/Off' button
The purification effect is poor	Air inlet/outlet is blocked	Clean the filter using s a soft brush to remove particulates.
	Wrong installation of the filter direction	Reinstall the filter the correct way.
	The filter is too dirty	Replace the filter
Air volume is small	Filter may be dirty	Replace the filter
	Packaging not removed	Ensure all packaging is removed
Abnormal noise from unit	Ensure all packaging is removed and check for damage to the unit Ensure the air inlet and outlet is not blocked by anything, and dean it if needed. While the negative ion function is on, "fizz" sound is normal.	
Poor signal	The speaker and Bluetooth-enabled device are too distant away from each other. Ensure the speaker is within a maximum of 10 meters of Bluetooth-enabled device, do the connection step again.	
Unable to detect any Bluetooth-enabled Device	Please switch off the unit for 10 seconds, connect to power source and switch on again.	
If you are not able to link up with Bluetooth	Please check whether any other devices are keep connecting with the Bluetooth speaker, it will require to disconnect the already paired device first. Then, do the pairing step with a new Bluetooth-enabled device.	

If above corrective actions do not solve the problem, please contact Breathing Better NZ. For safety, please do not disassemble the unit and maintain by yourself to avoid damage.
